WA Wilson produces insulating glass under the trade name StarLite.

As a licensee in the Insulating Glass Certification Council (IGCC), our product is certified using anodized aluminum spacers according to ASTM E2190 (formerly E773 and E774) standards.

The Profilglass anodized aluminum spacers are filled with desiccant, bent and joined with LiSEC insulating glass equipment creating StarLite's dual-seal hermetically dehydrated air space construction.

The primary insulating unit seal is polyisobutylene (PIB), and the secondary seal consists of GE 3723 silicone.

Starlite units carry a 10-year warranty against seal failure in most applications.

WA Wilson produces Heat Treated glass under the trade name TempRite that meets the requirements of:

ASTM C1036 Standard Specification for Flat Glass

ASTM C1048 Standard Specification for Heat Treated Glass

ANSI Z97.1 American National Standard for Safety Glazing Materials used in Buildings

16 CFR 1201 Category II Consumer Products Safety Commission Council (SGCC)
