

## StarLite Muntins

WA Wilson Star\*Lite insulated units ordered with muntins will be supplied with colonial style flat 5/8" wide white grids, unless another type is specified when ordering.

Colonial style grids run parallel to the glass edges, and form right angles when they bisect within the airspace.

Star\*Lite units are ordered with the number of horizontal bars first followed by the number of vertical bars, such as 1H, 3V.

Horizontal bars run the same direction as the unit base. Vertical bars run the same direction as the unit height.

If you are unsure about using the proper terminology, you may easily describe your configuration to us as so many muntin bars 'long' and so many muntin bars 'short'.

### **COLONIAL STYLE FLAT GRIDS**

- 5/8" wide flat muntins are available in white, bronze, anodized, mill finish, champagne, tan, hartford green, and earth tone.
- 13/16" wide flat muntins are available in white, bronze, mill finish, and champagne.
- 1" wide flat muntins are available in white, bronze, and black.

### **COLONIAL STYLE CONTOUR GRIDS**

WA Wilson also stocks 5/8" wide contour muntins in white and tan.

### **GRIDS-FLAT DIAMOND**

The Star\*Lite insulated unit is described by giving us the total number of whole and total number of partial diamonds formed by the grids

Our Diamond Grid muntins are available with a two week lead time in the following dimensions:

- 3/8 x 7/16 - White, bright white, bronze, tan, cocoa
- 5/8 x 1/4 - White, bright white, bronze, tan, cocoa
- 5/8 x 3/16 - White, bright white, bronze, tan, cocoa
- 5/8 x 3/8 - White, bright white, bronze
- 5/8 x 7/16 - White, bright white, tan, cocoa
- 3/8 x 1/4 - Polished brass

### **CUSTOM BENT FLAT GRID DIMENSIONS**
